

Gemvision Releases New Matrix

Apr 14, 2017

Edited by JMA (Source: National Jeweler)

Gemvision has released a new version of its Matrix 9.0 and Clayoo 2.5 software.

Some of the new features of Matrix 9.0 are:

--**Smart Pattern.** This addition to the series of Smart Tools uses simple flat patterns to create complex 3-D designs.

--**Clayoo 2.5.** This proprietary organic modeling suite allows users to design using SubD, Emboss, and the intuitive Sculpt method similar to carving and shaping clay. For a limited time, Matrix 9.0 upgrades will include a full version of Clayoo 2.5.

--**Updated Texture Builder.** These new tools allow you to use a grayscale image to control and apply creative surfaces and finishes to your designs in 3-D.

--**Stuller Manufacturing Integration.** Users now can submit a CAD model to Stuller right from the software for CAM, casting and more.

Existing Gemvision users can upgrade by visiting Gemvision.com (the upgrade is priced at \$895). New purchases of Matrix 9.0 can be made at the [Gemvision store](#) (priced at \$6,995). This new release is a milestone in jewelry designs.
